Junior software developer with a passion for user centered design principles. I aim to provide the best possible experience for users and the client.

EXPERIENCE

JANUARY 2015 - SEPTEMBER 2016
FIBRE OPTIC NETWORK DESIGNER, BIARRI NETWORKS

PRODUCT TESTING
Product tester for Biarri's automated network design tool. This role involved software release testing, liaising with the development team and using scrum boards for bug reporting. Consultation between the production/development team and the client was also an aspect of this role. This was completed to gauge if the product was at the standard the client required which involved client facing responsibilities and development team meeting attendance.

PROJECT PLANNING & TEAM LEADERSHIP
Team leader for design correction after construction walkouts on designs. This role involved helping teach the rest of the team best practice when it came to design and ensuring quality and consistency of the output. Another aspect of this role was coordination with the second in charge at the company, which included managing possible delays and problems in software or scheduling while still being able to deliver results.

CLIENT LIAISON
Consultant for quality assurance meetings and construction design meetings when working with Google Fibre, this involved many meetings and debriefings out of regular work hours. Client liaison for the production team which involved working in silicon valley to ensure design parameters were met and improve relationships with the client.

EDUCATION

JUNE 2021
BACHELOR OF COMPUTER SCIENCE, SWINBURNE UNIVERSITY OF TECHNOLOGY
Majoring in Software Development and co-majoring in Cyber Security

NOVEMBER 2014
BACHELOR OF SCIENCE, SWINBURNE UNIVERSITY OF TECHNOLOGY
Majoring in Biochemistry and co-majoring in Advanced Chemistry
